

Silverline Solution

On-demand RFID metal asset tagging

The Silverline Solution is ideal for on-demand RFID asset tagging for all surfaces, including metal and liquid-filled containers. The benefits of RFID are well known in industries from manufacturing and retail to transportation and healthcare. RFID systems—labels, printers and readers—enable inventory and equipment tracking in real time, helping you make maximum use of virtually all your assets.

Solving the Problem: Easily Identify Metal Assets and Liquid-filled Containers

There has, however, been one glaring RFID gap. RFID read performance deteriorates significantly when a traditional RFID label is applied on a metal surface or to a liquid-filled asset. This limits the use of RFID technology for tracking valuable assets like tools, automotive and machine parts, IT equipment, returnable containers, medical devices and equipment and liquid filled containers.

An Innovative Total Solution

To produce an effective read range, tags must be slightly thicker than traditional RFID labels, making them incompatible with standard thermal RFID printers. Now Zebra and Confidex have partnered to release the first solution for printing and encoding on-demand RFID labels for all your metal and liquid-filled assets.

The Ideal Combination

Zebra and Confidex have worked together to develop this unique solution consisting of a redesigned ZT410 RFID printer, optimized Silverline labels and high quality Zebra ribbons. This combination provides for excellent print quality, encoding accuracy and ease of solution deployment and use. Silverline labels, offered exclusively by Zebra, are available in four sizes to meet the needs of a wide variety of applications.
